

# MATTHEW LAWRENCE F. MAGALLANES

2nd year, Information Systems, INSYS 2-A

# About me

I was born and raised in Davao City and I live in Catalunan Grande.

My hobbies include animating, drawing, coding and playing badminton.

I am fond of learning new skills that make me a more professional person.

# Skills & Carrer goals

I want to develop technical skills that will make me a good programmer. These include learning programming languages, designing systems, and developing applications. As for soft skills, I want to be more outgoing and extroverted.

In the long run, when I am further into my career, I want to have created several projects that I am truly passionate about. As someone who is also into the arts, I want to combine my disciplines and create projects that I can proudly say are impressive.
