

## Initial Prompt

Create a one-page website for a personal portfolio.  
Include sections: Home, About Me, Skills, Projects, Contact.  
Use a clean modern design with a black, purple, yellow, pink, white, color schemes.  
Make it responsive and visually appealing.

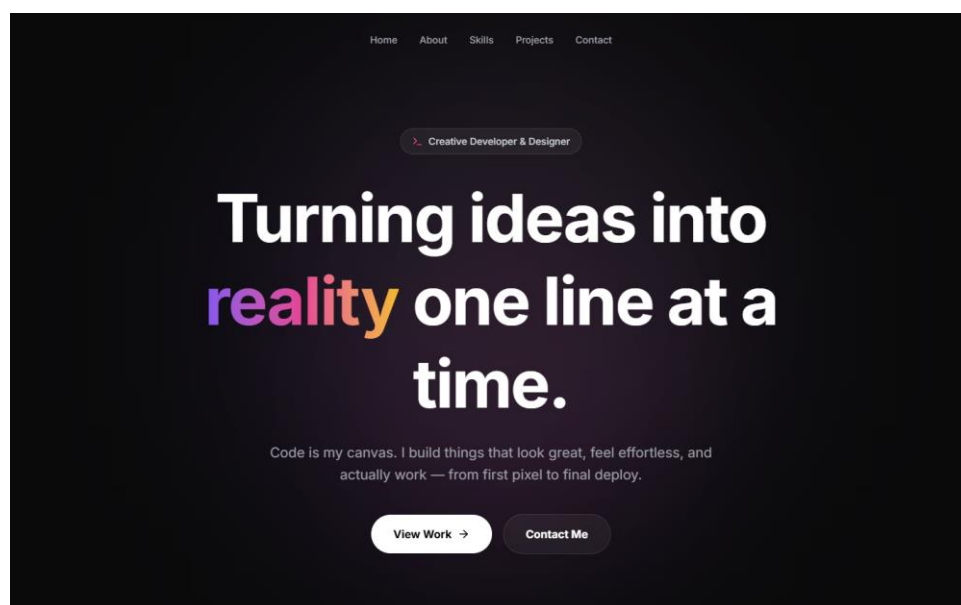

## Refinement Prompts

Remove the J.DEV at the left, move the "home, about, skills, projects, contact" to the middle, remove the "Let's Talk" button

when i click stuff in the navbar, apply a smooth animation going down

can you just put a different quote on the home

## Screenshots of Output

## Engineering with Soul.

I am a multidisciplinary developer based in the neon-lit intersection of design and engineering. My work focuses on creating digital environments that feel alive, intuitive, and remarkably polished.

For the past 5 years, I've been building applications that refuse to compromise. I believe that a great interface isn't just about moving data from A to B—it's about the feeling it leaves behind.

When I'm not pushing pixels or wrangling state, you'll find me exploring late-night cityscapes, dissecting brutalist architecture, or experimenting with generative art.

**5+**  
YEARS EXPERIENCE

**40+**  
PROJECTS SHIPPED

## My Arsenal.

The tools and technologies I use to bring ideas to life.

### Frontend

React TypeScript  
Next.js Tailwind CSS  
Framer Motion Three.js

### Backend

Node.js PostgreSQL  
Prisma Redis GraphQL  
REST APIs

### Design

Figma UI/UX  
Wireframing Prototyping  
Design Systems  
Typography

### Tools & Workflow

Git Docker Vercel  
AWS Jest CI/CD

## Selected Works.

A collection of projects exploring the intersection of design, interaction, and engineering.

### Neon CRM

A high-performance customer relationship manager with real-time analytics, electric dark mode aesthetics, and seamless keyboard navigation.

React TypeScript Tailwind Zustand

[Live Demo](#) [Source Code](#)

### Aura E-Commerce

Headless commerce storefront built for speed. Features dynamic product filtering, cart state management, and immersive micro-interactions.

Next.js Framer Motion Stripe Prisma

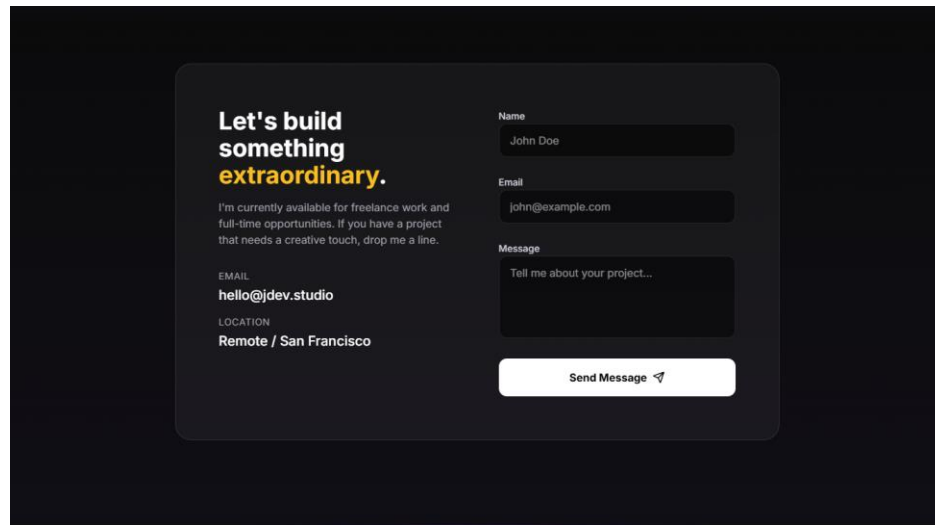

[Live Demo](#) [Source Code](#)

### Cipher Terminal

Web-based developer portfolio modeled after a UNIX terminal. Includes a custom command parser, file system simulation, and retro CRT effects.

### Pulse Analytics

Financial dashboard aggregating fragmented data into beautiful, actionable charts using customized D3 visualizations.

## Final Reflection

### 1.) What worked well?

- For the most part, the initial prompt gave me what I wanted, it even applied the coloring scheme properly.

### 2.) What needed manual fixing?

- Some elements such as the navbar. Since it wasn't to my liking at first, I manually told it to position it at the center.

### 3.) What did you learn about prompting?

- I learned that effective prompting can be a viable skillset to nurture. Since AI itself can build pleasing and effective apps and websites, learning how to prompt can really save time and resources.
